PROJECT UPDATES

NEW TAXI LANES ON JULIET

Work will resume on Airport Improvement Project (AIP20) in spring of 2006. Work is still on hold due to ground saturation and continuing rain.

HANGAR TRACKS H013 – H023

Vortex will continue to repair hangars during the coming months. Lower track for hangars 13, 14, 15, 16, 17, 18, 19, 20, 21, 22 and 23 has been fabricated and is currently stored in the hangars where it will be installed. This should take place later this spring. Upper track work on these hangars has been completed.

HANGAR ROOF REHABILITATION

Roof rehabilitation of hangars H013 – H036 is underway. The process consists of installation of hard, foam insulation and a vinyl skin, over the existing roofs. Tenants will need to cover or remove aircraft from the hangars for several days.

Florescent tube lights need to be removed from ceiling fixtures. Tenants in these hangars will be notified in advance of the work.

There have been some delays due to wet weather. Suzanne will continue to notify tenants of date changes. Please call the Airport office at 299.1695 or 253.4300 for updates.

GLIDE SLOPE STILL ON SCHEDULE

Glide Slope installation is still on schedule, with commissioning set for October-November, 2006.

SECURITY

GATE IDENTIFICATION PROGRAM

All automatic gates are now labeled with numbers. Manual gates are labeled with letters. You can report a gate out of order by contacting the Airport Office staff. Indicate the number or letter of the malfunctioning gate and describe the problem.
